Project Overview

Campus Portal is a static student web portal built as a university assignment. It presents campus information in a clean, modern layout using HTML, CSS, and JavaScript. The portal includes 6 main pages: Home, About, Resources, Gallery, Data, and Contact.

Page Structure

Home		index.html	
Landing page with welcome message and 3 feature cards (Resources, Gallery, Contact).			
• Header with navigation	• Welcome section	• 3 feature cards	• Footer

About		about.html	
Brief description of the Campus Portal project and its purpose.			
• Header with navigation	• About text section	• Footer	

Resources		resources.html	
Lists useful materials and links for students.			
• Header with navigation	• Resources list	• Footer	

Gallery		gallery.html	
Photo gallery with lightbox preview using the Lightbox2 library.			
• Header with navigation	• Image grid (6 images)	• Lightbox popup viewer	• Footer

Data

data.html

Dynamic table loaded from a JSON file via JavaScript fetch().

• Header with navigation	• Data table (Category, Title, Date, Room)	• JSON-powered content	• Footer
--------------------------	--	------------------------	----------

Contact

contact.html

Contact form with client-side validation including JS form-validation.js.

• Name input	• Email input	• Topic dropdown	• Radio buttons	• Message textarea	• Checkbox + Submit
--------------	---------------	------------------	-----------------	--------------------	---------------------

Design System
